### **Palm Coast Releases 2024 Water Quality Report in Observance of Water Quality Month**

**Palm Coast** – As the City of Palm Coast observes Water Quality Month throughout August, we're proud to announce the release of our 2024 Water Quality Report. This annual report is now readily available for all residents to view on our website.

This comprehensive document offers valuable insight into the source of Palm Coast's drinking water, the rigorous testing it undergoes, and the detailed results of those tests. It's an essential resource for residents to understand the exceptional standards upheld by the City's Utility Department.

Adding to our city's well-deserved reputation for quality, Palm Coast was recently honored by the Florida Section of the American Water Works Association (FSAWWA) for having the best-tasting water in the region. This recognition is a direct reflection of the tireless dedication and expertise of our Utility Department team.

"Our team works tirelessly year-round to ensure the highest quality drinking water reaches every tap in Palm Coast," said Garann Hopkins, Utility Compliance Coordinator for the City of Palm Coast. "Water Quality Month is a perfect time to recognize these efforts and to remind our residents of the meticulous care and advanced processes involved in delivering water that not only meets but often exceeds all regulatory standards. We encourage everyone to review the 2024 Water Quality Report and see the commitment behind every drop."

The City of Palm Coast remains committed to its mission of protecting public health and the environment through sustainable water management practices. We encourage all residents to visit [palmcoast.gov/utility/wqr](https://palmcoast.gov/utility/wqr) to access the 2024 Water Quality Report and learn more about their drinking water.
